

## Custom Tile

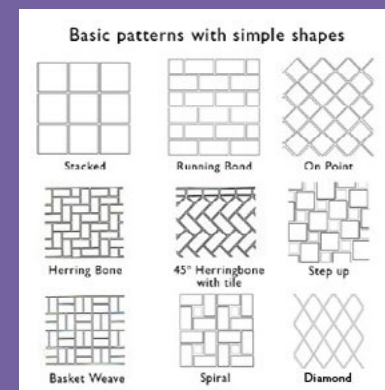

H9: 3309 Aldrich Ave S | Designer: Amy Hinck

Project Type: Kitchen

When you choose handmade tile, you bring warmth, depth, unique personality, and a personal and artistic touch to your home. Handmade tiles contain subtleties and variations that breathe life into your space. With many color choices custom handmade tiles can be personalized to your design tastes. You may be surprised at what combinations speak to you and your home. To find out how handmade tiles are made check out the video from our partner Clay Squared, provided in the Digital Assests Library.

Some projects are suitable for the do-it-yourselfer, including: mounting tiles for a wall hanging, home projects on a table top, planter or picture frame, and even a small kitchen backsplash. These projects can be done with planning, proper preparation, and the use of quality materials. The [handmadetileassociation.org](http://handmadetileassociation.org) web site offers how-to-tips and links to consultants who are available for technical advice. Many projects that require permanence are best done by professionals. When considering tile for kitchens, baths, fireplaces, foyers, interior or exterior, residential or commercial, here are a few questions to ask a professional designer, architect and or a tile contractor.

- What is the best layout for my space?
- How much tile do I need?
- Do I need trim pieces?
- How is the substrate prepared?
- Can the tile be walked on?
- Can the tile be installed outside?
- Are there any plumbing or electrical considerations?
- Is there a difference in the quality of setting, grouting and sealing materials?
- Are the products and labor guaranteed to last
- Will project be done in a timely manner?
- How do I maintain my tile installation?

Handmade tile, properly installed will provide lasting beauty, years of functionality, and durability to any project for your home. The benefits of hiring a professional will more than pay for itself in the long run.
